The prizes were announced at the Tokyo Game Show 2019, which was held from September 12-15. Additionally, *Project Resistance* was recognized in the Future Division Awards.

*Resident Evil 2*, winner of an Award for Excellence, utilized Capcom's cutting-edge R&D facilities to rebuild the original 1998 game, which was the fourth best-selling game in the series' history, completely from the ground up for current-generation game platforms. Utilizing Capcom's proprietary RE Engine, the game boasts the series' most finely-detailed visuals, beautifully rendering the distinctive characters and high-speed, stylish action the games are known for, resulting in high praise and shipments in excess of 2.5 million units\* worldwide. \*As of June 30, 2019

In the Future Division, where players vote to select the upcoming titles they most look forward to, *Project Resistance* received an award. This title was very popular among show attendees, with tickets for the game demo running out moments after doors to the show were opened.
